RESOLUTION

WHEREAS, even though there are certain inaccuracies in the Final Generic Environmental Impact Statement, including the Revisions, Comments and Responses made and received in connection therewith, including the January 14, 1998, correspondence submitted by the New York State Office of Parks, Recreation and Historic Preservation which was subsequently specifically addressed by Wendel's Memorandum of February 10, 1998, to Town Supervisor Gardiner, and

WHEREAS, it is generally acknowledged that there are certain elements and scenarios set forth therein which may never be fully, or even partially, included in the future comprehensive development of the study area, Nevertheless, the Urbana Town Board is of the present opinion that, when viewed in its entirety, this document presents generally beneficial guidelines for the development of the Keuka Lake Lakefront, including the Town of Urbana's Park Area, the preservation of a Green Space Area on the Bath-Hammondsport Railroad's property which is complemented by some compatible residential developemnt areas adjacent thereto as well as the siting of a connecting walkway extending from the Northerly edge of and crossing over Cold Brook Creek and then continuing onward to Champlin Beach, and

WHEREAS, it has been determined that this document may serve as a guideline for some potential future developemnt in the study area, including a review thereof by the Town Board of the Town of Urbana, its Planning Board and its Zoning Board of Appeals,

NOW, THEREFORE, BE IT RESOLVED that the Town Board of the Town of Urbana hereby officially accepts and files the Final Generic Environmental Impact Statement, including the Revisions, the written Comments and Responses made and received by it in connection therewith and has caused the original Final Generic Environmental Impact Statement and the referenced submissions to be marked as accepted and filed on this the 12th day of February, 1998.

Kent Collins, Chairman of the Board of Fire Commissioners, discussed the Fire District's request to hook up to the Village of Hammondsport's municipal water system. They wrote to both boards earlier in the year, expressing their desire to extend

extend the water line to the fire hall property. Hooking up to municipal water would eliminate yearly repairs to the existing well which is sandy; it would allow tankers to be filled on site with amounts metered, which would aid the village in tracking their unaccountable water. It would provide the district with continuous potable water for use and consumption.

The estimated cost of the project is $27,500. Chairman Collins stated that if permission for this hook-up could be given soon, coordination of this project with the Village's street reconstruction project could save the District money, as far as contractor mobilization costs and purchase of pipe through the Village.

Supervisor Gardiner stated that the Town Board would rather look at the creation of a new water district on a broader scale, one large district that would include the District property. DPW Supt. Hoad stated that at present, the Village is pumping at 1/3 rd capacity, and could easily supply water to a larger area and more customers.

Given the information discussed, the Town Board will pursue the creation of an additional water district to include the Fire District property on Rt. 54.

B & H RAILROAD ABANDONMENT:

Supervisor Gardiner explained the process of railroad abandonment. Operating railroads paid taxes on a smaller scale established by the State (railroad ceilings), so when they cease to operate, the property, per statute, must be offered to all government agencies before it can be privately sold. State agencies, Steuben County and the Town and Village were all offered the ability to exercise preferential right to this particular property. The only agency that did so by the due date of January 9th was the Town of Urbana. The reason for doing so was to stop the process long enough for this community to look at the property, discuss possible uses for it, and to decide whether or not it would be in our community's best interest to retain for public use. The Town now has 180 days from the filing date of January 9th to decide.

There was much discussion concerning quality of the land, due to its prior use as a dump area. Mayor Cummings stated that he discussed this with a B&H Railroad Board member prior to this evenings meeting and was assured that soil tests that were done were favorable, and only indicated traces of the chemicals that railroad ties were treated with. Supervisor Gardiner stated that his information was that soil tests were not favorable, and Councilman Webster stated that this area is listed on a NYS DEC list of dumpsites.

It was suggested that firm, documented information regarding soil tests and the location of the test holes is needed, before the two boards can continue their discussion concerning any possible uses or development of this area. Mayor Cummings agreed to contact the B&H Railroad to get written information on their tests, and Supervisor Gardiner will contact John Hicks from the Region 8 DEC office to request written information they have on file in regards to soil conditions on this property. (Mr. Hicks was asked to be at this meeting, but did not attend.)

Dene Lee, a representative from the Trust for Public Land, whose purpose is to save land for people through public acquisition, attended the meeting. She gave a brief overview of what their organization does, and the help they can provide should the Town decide to purchase the railroad property. They will help with the Phase II Environmental Review, and get the property appraised in order to determine its fair market value.

22

Based on the discussion it was determined that:

1. Verified information is needed regarding soil quality of the property. Once this information is obtained, the Boards will meet again to discuss how and if the property can be used to benefit the communtiy.

ON MOTION of Trustee King and Councilperson Pierce and seconded by Trustee Pennise and Councilman Chadwick, and carried unanimously to adjourn the joint meeting at 8:02 P.M.

Town Assessor Kathy Harter introduced Gerry Czup, New York State Real Property Regional Representative. Mr. Czup explained the purpose of a revaluation project. A revaluation project would produce greater equity in local assessments. It would not necessarily generate additional tax revenue. Town Assessor Harter feels this project is needed inorder to be sure the data cards on file are consistent with the actual property. Town Assessor Harter feels some land descriptions have changed and this project would enable the assessor to make on-site inspections of each parcel on the tax roll. Town Assessor Harter would do the on-site inspection over a two year period and figures could be implemented on the 2001 Tax Roll. Mr. Czup presented a sales analysis report for 65 recent sales in the Town of Urbana and the Village of Hammond sport. The report showed that values have changed.

Town Historian Terry Bretherton presented a Record Book of all Town of Urbana residents that were in the Military from 1861 -1865. Historian Bretherton requested the Town to have the book re-bound and preserved. The Town granted his request as funds have been appropriated in the budget in order to continue preservation of vital records.

DEPOT PROJECT: Supervisor Gardiner reported that he has spoken with Architect Donald Reitz concerning construction that needs to be done before winter. The request for price quotes has been advertised.
